

ENVIRONMENTAL METHOD STATEMENT: Dust Mitigation

Objective:

This Environmental Method Statement for Dust Mitigation outlines measures to control and minimize dust emissions on-site.

Purpose:

The purpose of this Environmental Method Statement (EMS) for Dust Mitigation is to outline the strategies and measures that will be implemented to control and minimize dust emissions during construction or land-disturbing activities.

Scope:

- Dust control.
- Vehicle and traffic management.

Works, management actions, controls:

1. Dust control.
 - Spraying water on roads and exposed surfaces.
2. Vehicle and traffic management.
 - Designate access routes and speed limits.

Conclusion:

By following these environmentally sound procedures, the project will help protect natural resources, reduce pollution, promote safety and comply with environmental regulations.
